

# True Row Guidance

For Corn Harvesting

## Introducing TrueSight

A high accuracy row-crop autosteer control system for corn harvesting

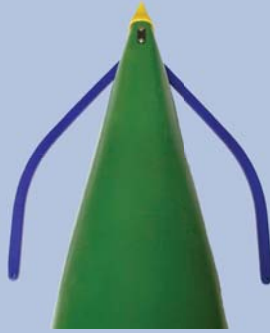

### Benefits of Row Guidance

- Frees operator for other tasks
- Reduces operator fatigue
- Allows you to run faster
- Maintains course in poor visibility
- Improves feeding in down corn

## How it works

TrueSight uses sensing wands to feel the rows and guide the combine down it. It is not tied to GPS, therefore can be installed on any combine once a steering valve or motor is installed

In-cab controller

### Available for Fall '09

- JD AutoTrac
- CNH AccuGuide / IntelliSteer
- EZ-Steer
- Trimble AutoPilot
- AutoFarm Ontrac

Order by May 1st to Guarantee availability

"We harvested 3,500 acres of down corn at 3 to 3.5 mph where we rarely saw the tips on the snouts. Without TrueSight we couldn't even find the rows. The operator fatigue that is saved in down and standing corn is unbelievable."

~Winston in Illinois

"I'm not sure I would buy a combine without TrueSight, it was a life-saver for me this year."

~Gary in Illinois
