ELECTRICAL ADAPTERS FOR UNMATCHED COMBINES AND HEADERS

JD 600F and 900F CONVERSIONS

Adapt JD600F or 900F to D-A-M combines

Converts electronics of
2000 or newer JD flex header
To 1999 or older JD combine
in less than 15 minutes!

- * Plug and go set up
- * Eliminates need for BH84098 & BH84095 for 600F
- * Gives the operator infinite height control instead of only 3 positions
- * Simply remove when using 50 or 60 series combine

900F = HPO-JD10-31J	-----	\$675 list
600F = HPO-JD10-31Q	-----	\$725 list (still requires BH84096 \$405)

Adapt JD600F to CIH, NH, or AGCO combines

- ✓ Converts all required electrical functions
- ✓ Gives the operator in cab controls of HydraFlex™ function
- ✓ Includes in-cab pressure indicator
- ✓ No splicing required
- ✓ Works with or without Fieldtracker™

\$1650 FOR MOST COMBINATIONS.

Electrical Interface

600F Pressure Gauge for CIH combine

JD 50 and 60 Series Combines to pre-2000 900 Flex Headers

Provides wiring for a 900 Flex header to match a JD 50 or 60 series combine. Contains wiring for contour and header height sensor, and pigtail to plug into 16 pin header connector. Includes bracket for 50 series combines only.

CIH 2020 and 2010 Headers to CIH Combines 2300-1600

Adapts 2020 flex and 2010 rigid headers to combine models 2300-1600 in minutes.

- ✓ Complete installation in less than 15 minutes.
- ✓ Plug, calibrate combine, and go.
- ✓ Header converts back to CIH 8010 in seconds.
- ✓ Uses Headsight® conversion box.

NH 74C Flex Header to Unmatched Combine

Adapt NH 74C headers to a TR or other model combine.

- ✓ Controls height and tilt (if combine equipped)
- ✓ Upgrades combine to infinite height control, and tilt sensitivity in the cab.
- ✓ Requires rotating the potentiometers on header then simply plug and go.

PRICING: \$1225 HPO-NHTR-31N

JD D-A-M (Dial-a-Matic)™ Headers to Unmatched Combines

Uses a simple potentiometer conversion package which replaces the D-A-M boxes on the header. One bundle for height, another bundle for tilt control.

Then plug and go with Headsight control box or wiring harness (depends upon the combine). Pricing varies upon the combine call for more info.

JD Sensors on Corn Headers to Unmatched Combine.

This kit allows JD factory sensors on a corn header to work with a JD combine that utilizes Dial-A-Matic for its auto height control.

Allows JD sensors to work with JD D-A-M combine

- ✓ Gives the operator infinite height control.
- ✓ Allows for sensor calibration
- ✓ Works with tilt and height circuits on combine.

PRICING: 60 SERIES CONNECTOR: \$895 HCO-JD10-31Q

50 SERIES CONNECTOR: \$895 HCO-JD10-31J

JD 9000 Combines w/out Header Control

For combines w/out header control we offer a simple easy to install system that gives the operator infinite height control. This system works with potentiometer based header sensors.

PRICE: \$2040 HIC-HH10

Custom Jobs for Specialty Crops

If you have a need for header control on any type of harvesting device which utilizes electro-hydraulics, we will work with you.

We have provided auto height control solutions on a variety of pickers, choppers and harvesters. If you are interested, we can work with your specific situation. Call and ask for Rich.
