Updating Insight® Software

Updating software may cause the Foresight option to be disabled. If you have purchased Foresight, contact Headsight before updating software.

1. You will need:
   - SD memory card (2GB or less)
   - Means of loading SD memory Card (computer with SD memory card drive, or usb drive with a usb to SD card memory adapter, or preloaded SD memory card from Headsight)
   - Small allen wrench or screwdriver

2. Load SD card with new software files
   - Place insightf.hex in the root directory of SD card (ex. E:\insightf.hex)
   - Do not change file names

3. If you do not have the new files you may
   - Download updated software from www.headsight.com
   - Request pre-loaded SD card from Headsight, Inc.

4. Disconnect all header connections from combine

5. Remove 4 screws from rear of Insight box - remove rear cover

6. Insert programmed SD card into SD card slot on rear of board

7. Power Insight
   - Connect all wiring to combine
   - Turn on key switch

8. Wait for software to download
   - Yellow light will blink while download is in progress
   - Green light will turn on solid when download is complete

9. Verify update is successful
   - Go to >>About Insight>>Software Version and read software version number

10. Remove power from Insight
    - Turn off key

11. Remove SD card

12. Reinstall rear cover
    - Fasten with screws
